Product Description

Wood Slat Wall Panels - Wood Black Acoustic Felt - 2400x600x22mm

Product Information:

Wood Slat Wall Panels - Wood Black Acoustic Felt - 2400x600x22mm

Wood Slat Wall Panels - Wood Black Acoustic Felt - 2400x600x22mm Features:

Wood Slat Wall Panels - Wood Black Acoustic Felt - 2400x600x22mm are perfect for adding natural wood decoration and traditional elegance to a space, and the innovative decorative style will transform your interior!

This modern way of beautifying a space has conquered the world in a very short time and has become a popular and sought-after object in the decoration industry.

These decorative sound-absorbing panels are in the form of wooden slats attached to felt (available in a variety of colors). These panels are not only suitable as a decoration for walls or ceilings, but also an excellent finish for furniture or free-standing walls. Those who need a quiet and soundproof room will also find other uses for our panels. These panels have acoustic properties, so you can use them as soundproof panels and attenuate ambient noise in the room and unwanted interference from the outside world.

The possibilities of decorating a space with Wood Slat Wall Panels - Wood Black Acoustic Felt - 2400x600x22mm are endless! Available in 3 sizes (which can also be custom made), our acoustic panels allow you to create any design of your choice on the wall and give your space an elegant and unique look that will make your interior space stand out.

Premium acoustic wood panels are designed to support beautiful interior décor while acting as a practical sound absorption solution. The acoustic felt backing helps reduce background noise, while the slatted panel design offers an unparalleled aesthetic advantage to a wide range of interior décor.

These wooden slats offer excellent noise reduction properties and also help improve the overall sound quality of the space they are installed in.

Our PET slatted PET backed acoustic panels have been carefully designed to easily transform any space, visually and acoustically enhancing the surroundings. These panels help create an environment that is not only quiet but also beautiful, modern, soothing and relaxing.

Not only do these panels offer aesthetic sophistication and superior soundproofing, they are also produced using only environmentally friendly materials. All materials come from certified sustainable sources - a completely eco-friendly product.

Simply screw the panels directly into the wall through the acoustic felt using the correct fixings, or if you wish to further enhance the sound performance, screw them into the baton. If installing in the ceiling, the panels can be screwed directly into the ceiling joists.

All of our wall and ceiling systems require virtually no maintenance once installed, with none of the age-old problems associated with paint or porous materials.

Product	Wood Slat PET Acoustic Panels
Fireproof Grade	SGS -ASTM E84 CLASS A, TUV- EN 13501 CLASS B
Material	MDF + Polyester Fiber + Veneer
Veneer	Milamire/technical wood/pvc/nature wood

Sound Absorbing panels

Difussion

Scatter sound through irregular surfaces, improving indoor sound distribution, reducing front-to-rear sound level differences, balancing clarity and fullness, and eliminating echo.

Sound-absorbing

Polyester fiber is an effective sound-absorbing material that aids in indoor sound absorption and noise reduction.

Introduction of Materials

Polyester board - substrate - veneer

Acoustical felt

The felt is made from recycle plastic (bottles)
The felt absorbs the sound waves and dampens the sound.

Surface

Wood from sustainable forestry
All the wood we use comes from sustainable forestry, which ensures that the forest can reproduce more trees than what is being cut.

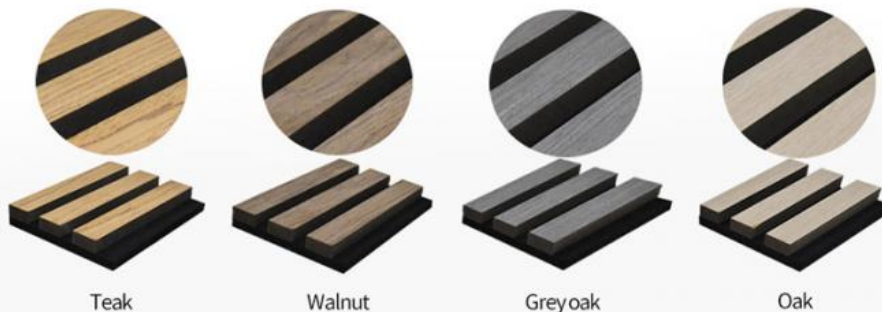

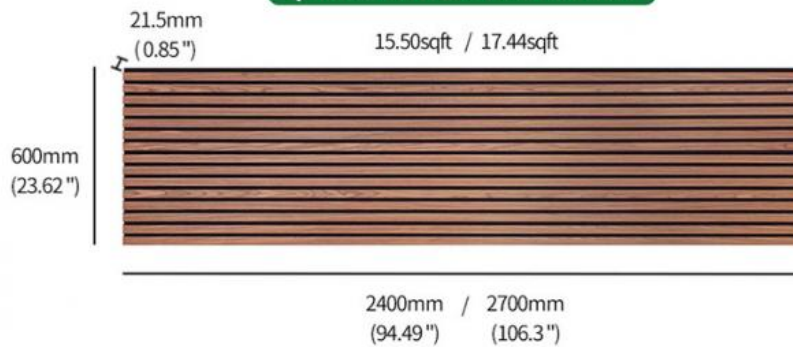

Slats

The core of the acoustics panel consists of a medium density fibreboard and is available in black or a natural colour. The slats create diffusion, which essentially means that they break the sound waves and thereby dampen the sound.

Size And Color

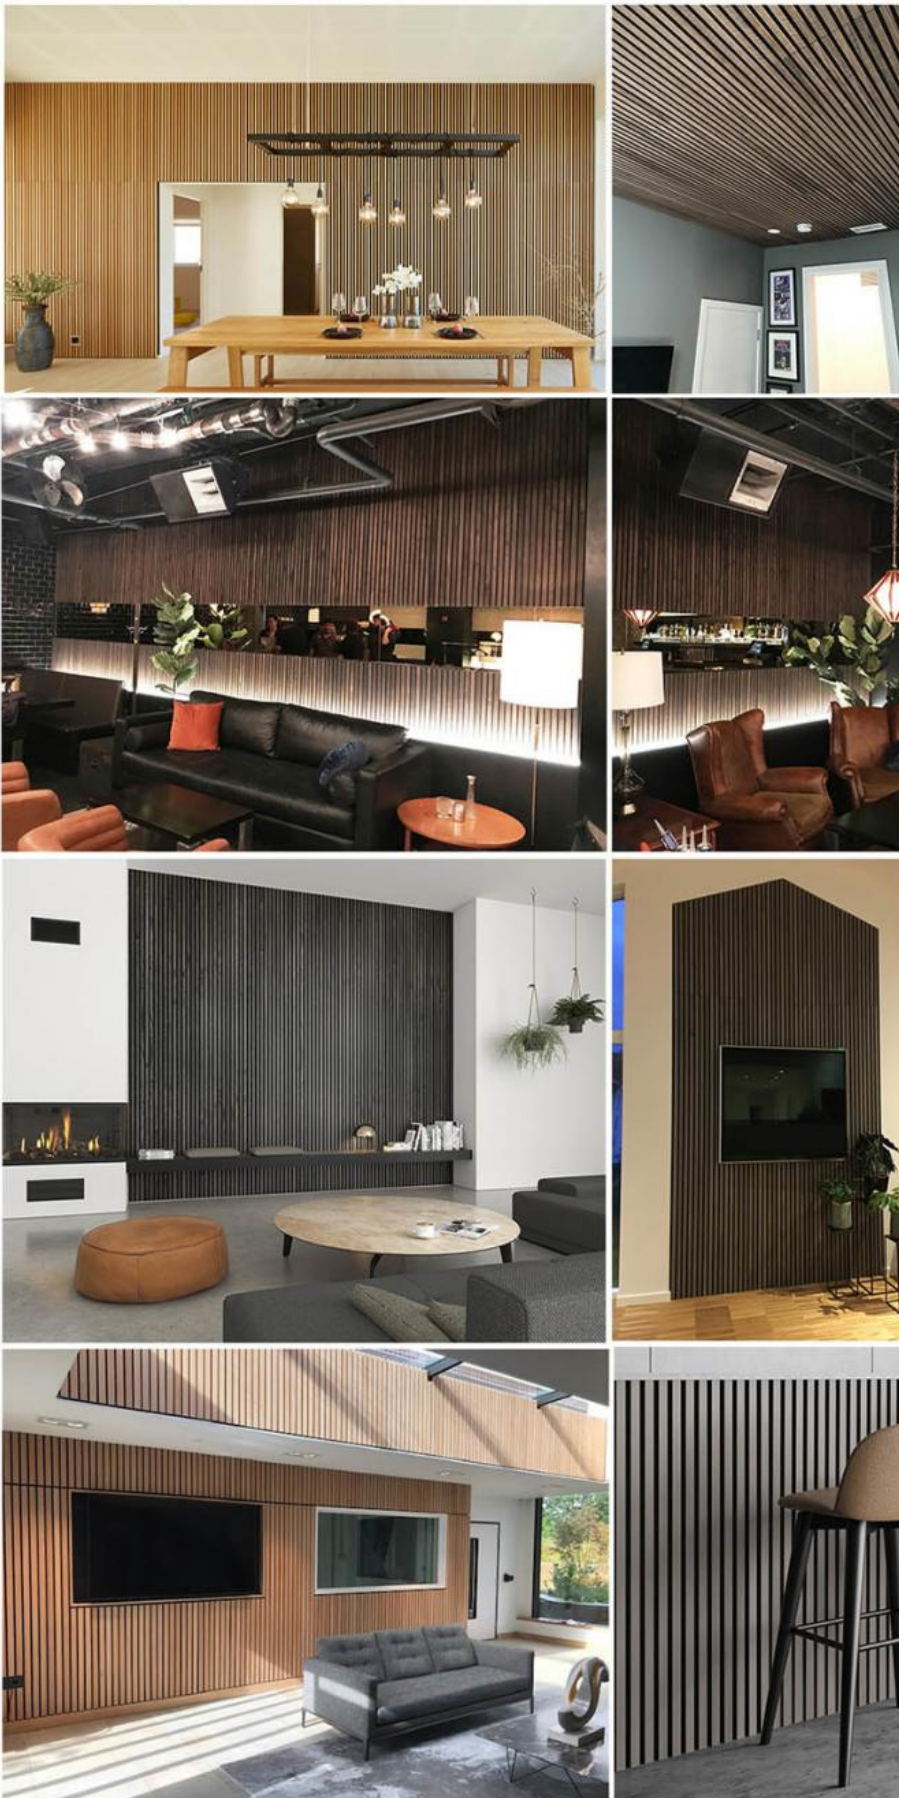

we have more other customized size and color

Welcome to consult and customize

Multiple application space

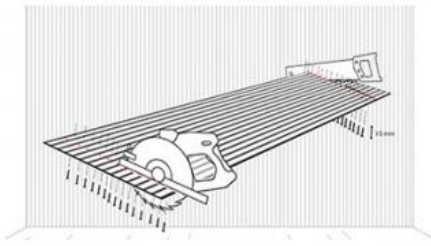

Primarily used in commercial spaces, our acoustic panels provide excellent sound reduction. Due to their warm soft aesthetics, more and more private clients are choosing them for their own residences.

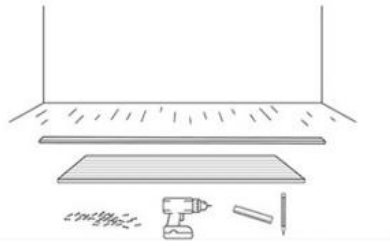

About Installation

FULLY CUSTOMIZABLE

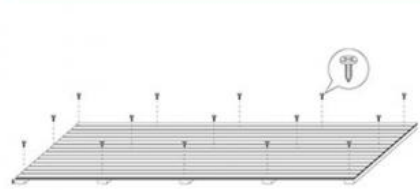

Make it Yours From headboards, to TV walls, and anything in between, you can easily cut Willow Panels by hand to perfectly suit your project.
