## Product Description

### Part of an aesthetic and comfortable workplace

Acoustic desk screens are a great way to ensure employees in an open-plan office a little bit of privacy and increase their concentration. The screens made from PET felt not only absorb background noise perfectly, but are also sustainable.

MQ PET are exclusive acoustic screens which are integral part of a modern, aesthetic and comfortable workplace.

Bring balance and focus to your workspace with MQ Acoustics Desk Screens. Made from PET – a lightweight, solid colour, 100% polyester panel – Desk Screens have a smooth, elegant finish, with no capping required. MQ Desk Screens are truly acoustic, absorbing sound across the frequency spectrum. This allows distracting chatter and background noise to be controlled at the source, supporting the overall acoustic balance of your space. Through constructing separate working zones and a visual sense of division, MQ Desk Screens help support social distancing in the workplace. As every office is different, customisation is important. MQ Desk Clamps are designed to fit any desk, and are easily moved and fixed without damaging or altering the desk – offering the freedom to quickly rearrange when required.

#### PRESSED SCREENS

With sleek, rounded edges, and a minimalist embossed design, Pressed Screens bring a unique textural aesthetic to the MQ Desk Screen range. Effortlessly enhance furnishing design in open-plan workspaces with our Pressed Screen in Polka, or put your own stamp on your space with a custom pattern. Through a moulding process, Cube is heated, then pressed, to create an embossed pattern with rounded edges on each side. This allows for pattern continuity, so your screen looks good from any angle. The rounded edges offer a softer, more sophisticated look – creating the illusion of a thinner screen.

In the workspace, privacy and sound insulation have a significant impact on comfort and productivity. What's more, creating a physical barrier between work stations helps employees stay healthy.

Our desk dividers look clean and modern, and are available in a variety of sizes, shapes, and mounting options.
