Product Description

Sound Barrier - Keeping Noise Pollution at Bay

Sound Barrier - Keeping Noise Pollution at Bay

Sound Barrier is a breakthrough product that has revolutionized the field of noise pollution control. This innovative product has been designed to tackle the problem of excessive noise in various industrial, commercial and residential spaces. Sound Barrier is a highly effective noise control solution that offers a host of benefits and advantages over traditional sound reduction methods.

One of the key advantages of Sound Barrier is its efficiency in reducing noise levels. The product is designed to absorb sound waves and prevent them from passing through a material. This results in a significant reduction in the amount of noise that is allowed to pass through, resulting in a quieter and more peaceful environment. Sound Barrier has been rigorously tested and has been proven to reduce noise levels by up to 50%.

Another notable benefit of Sound Barrier is its versatility in application. The product is suitable for a wide range of environments, from busy factories to residential homes. Sound Barrier is designed to be installed in a variety of formats, including ceiling tiles, wall panels, and floor mats. This makes it easy to customize the product to suit any space, no matter how big or small.

Sound Barrier is also highly durable and long-lasting. The product is made from high-quality materials that are designed to withstand the rigors of daily use. This means that Sound Barrier can provide long-term noise reduction benefits, saving businesses and individuals time and money on costly sound reduction initiatives.

Another major advantage of Sound Barrier is its ease of installation. The product is designed to be installed quickly and easily, with minimal disruption to daily activities. This means that businesses and individuals can enjoy the benefits of noise reduction without having to put up with lengthy installation processes.

Sound Barrier is available in a wide range of sizes and specifications, making it easy to find the perfect product to suit your needs. Whether you need a small panel for a residential room or large-scale ceiling tiles for an industrial environment, Sound Barrier is the ideal solution.

In conclusion, Sound Barrier is a highly effective and versatile product that offers a range of benefits and advantages over traditional sound reduction methods. Its efficiency, durability, ease of installation, and versatility make it the perfect solution for tackling noise pollution in various environments. With its innovative design and proven effectiveness, Sound Barrier is the ultimate choice for individuals and businesses in need of a reliable and effective noise reduction solution.

FAQ

1.Can I get free samples and how long does it take to produce samples?

If the samples you need are in our stock, they will be provided to you free of charge. Customized samples usually take about a week to produce.

2. Do you accept OEM or ODM order?

Yes, as a manufacturer, we can produce acoustic materials based on your samples or drawings. Please do not hesitate to contact us.

3. How to get an accurate quotation?

Can provide us with detailed product information, such as pattern, core material, surface, etc. If you have CAD or other drawings, don't hesitate to send it to us.

4. Payment terms

T/T 30% deposit before production, 70% balanced payment before delivery.

For more information, please feel free to contact us.

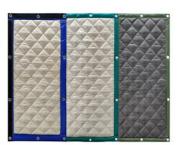

Acoustic Barrier

Specifications

- 1 Finish Materials:PVC Tarpaulin & Fabric
- 2 Inner Materials: Acoustic cotton & Sound insulation felt
- 3 Size:2400*1000mm (customization is available)
- 4 Standard Thickness:15 -18 mm
- 6 Color:Green, Grey, Black, Blue
- 6 Weight:7kgs/m²
- 7 Fabric Design: Rhombus, Vertical Line, Square
- 8 Absorption Coefficient: 17-27dB

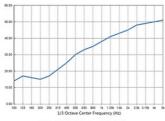

Product Features

Portable acoustic barrier is designed with high-adhesive velcro around it and the joints are seamlessly connected, effectively blocking noise, dust and light pollution. The use of sound barriers with steel frames is suitable for large-area paving, and is generally used in temporary buildings or high-noise places where frequent disassembly and assembly are required.
