Products Description

A 3D acoustic panel is a type of acoustic wall that uses three-dimensional sound waves to create an effect similar to naturally occurring sounds. This technology can be used in various settings, such as commercial buildings, schools, homes, and offices.

3D acoustic panels are a great way to improve the sound quality of your music or movie listening experience. They provide an immersive surround sound experience that can be very helpful for people who have trouble hearing in crowds or want to watch movies privately.

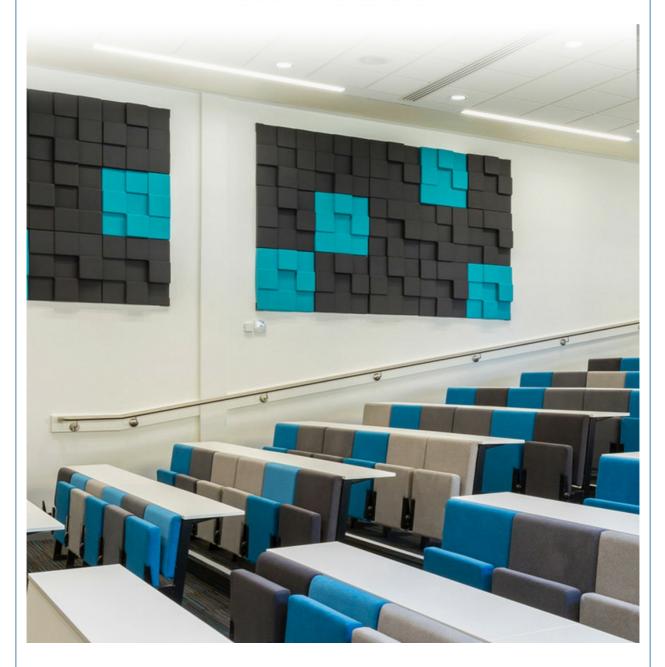

Material	100% polyester fiber
Shape	Hexagon
Size	46.2*40.4cm
Thickness	2.6cm
Function	Environmentally friendly sound-insulating material

NEW ARRIVAL HOT-PRESSED FABRIC SURFACE

Features

acoustic and noise reduction

widely used

Fire-retardant

Impact-resistant

three-dimensional texture

Easy construction

Any shape

Highly decorative

QUICK AND EASY INSTALLATION

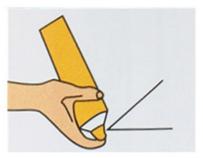

1.Keep the surface clean and operate in a dry,oil-fee condition

3.Spray evenly from 20-30cm away from the bonding surface

2.Please shake well before use to achieve better results

4.Invert the sprinkler irrigation after use andspray downward forabout 2-3seconds to clean the residual glue and avoid clogging of the spray head

FIRE RESISTANT 3D FIBRE

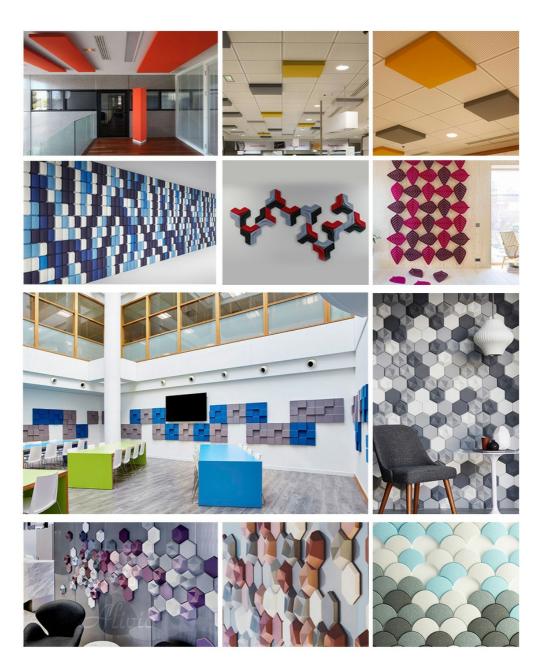

Fire resistant 3D fibre acoustic panels is easy to work with, easy to maintain and a wide range of colours

THE 3D POLYESTER

The 3D polyester fiberboard is made of polyester fiber by high-tech hot pressing. It made in the shape of cocoon cotton to achieve density diversity and ensure ventilation. The highest sound absorption coefficient in the noise range of 125~4000HZ can reach 0.9 or more, and it has good performance in the middle and high frequency range.

ACOUSTIC DECORATIVE TREATMENT IS NOT THAT DIFFICULT

MEETING DIVERSEACOUSTIC AND DECORATIVE NEEDS

Schools

Concert halls

Theatres

Hotels

Bars

Study rooms

Company Profile

About Us

Magic Cube (MQ) Acoustics is a professional acoustic solution provider, integrating acoustic material manufacturing, architectural acoustical environment construction and industrial noise control. We are committed to the combination of Acoustics & Aesthetic, to offering our clients the best acoustic solution with high quality acoustic material.

In order to meet the higher needs of customers, we has introduced advanced production equipment which has fully guaranteed product quality and technology. After 5 years of rapid development, we has an annual output of more than 500,000 square meters of various acoustic materials.

FAQ

1. Can I get free samples and how long does it take to produce samples?

If the samples you need are in our stock, they will be provided to you for free. Customized samples usually take about a

week to produce.

2. Do you accept OEM or ODM order?

Yes, as a manufacturer, we can produce acoustic materials based on your samples or drawings. Please do not hesitate to contact us.

3. How to get an accurate quotation?

Can provide us with detailed product information, such as pattern, core material, surface, etc. If you have CAD or other drawings, don't hesitate to send it to us.

4. Payment terms

T/T 30% deposit before production, 70% balanced payment before delivery.

For more information, please feel free to contact us.
