Product Description

Products Description

Timber slat wall panels represent an ideal fusion of polyester fiber acoustic panels and MDF wood slats. We utilize high-density polyester fiber acoustic panels as the base, while the finish of the timber slats can be customized to meet your specific requirements.

These timber slat wall panels are designed to optimize sound absorption in the mid-range frequency spectrum, while still preserving some higher frequencies. They exhibit excellent sound absorption properties, effectively reducing indoor reverberation time and enhancing both clarity and richness of speech within the environment.

Company Profile

ABOUT US

Magic Cube (MQ) Acoustics is a professional acoustic solution provider, integrating acoustic material manufacturing, architectural acoustical environment construction and industrial noise control. We are committed to the combination of Acoustics & Aesthetic, to offering our clients the best acoustic solution with high quality acoustic material.

In order to meet the higher needs of customers, we has introduced advanced production equipment which has fully guaranteed product quality and technology. After 5 years of rapid development, we has an annual output of more than 500,000 square meters of various acoustic materials.

FAQ

1. Can I get free samples and how long does it take to produce samples?

If the samples you need are in our stock, they will be provided to you free of charge. Customized samples usually take about a week to produce.

2. Do you accept OEM or ODM order?

Yes, as a manufacturer, we can produce acoustic materials based on your samples or drawings. Please do not hesitate to contact us.

3. How to get an accurate quotation?

Can provide us with detailed product information, such as pattern, core material, surface, etc. If you have CAD or other drawings,

don't hesitate to send it to us.

4. Payment terms

T/T 30% deposit before production, 70% balanced payment before delivery.

For more information, please feel free to contact us.
