Size And Color

we have more other customized size and color

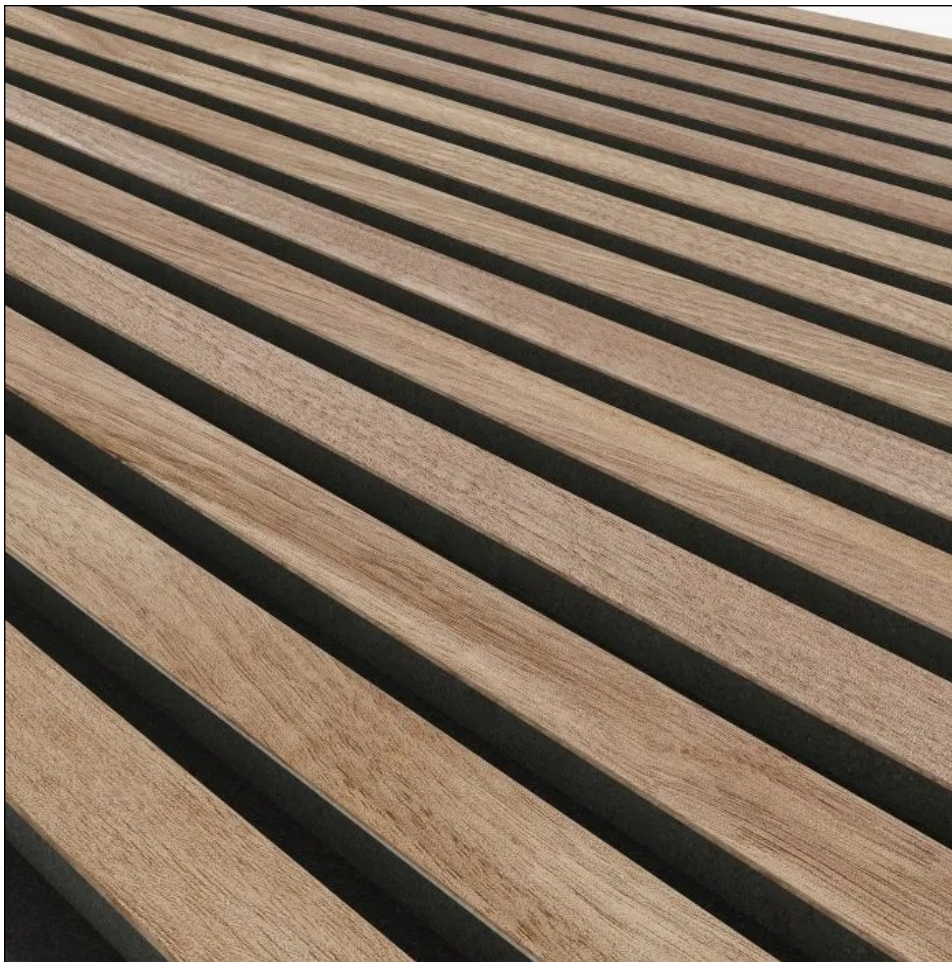

Welcome to consult and customize

Class A Sound Absorption:

Do you have problems with poor acoustics in your room? Theacoustical panels are sound dampening and when installing them onwalls or the ceiling, they will absorb the sound waves and remove reverberation.

Our panels will reach a Class A rating when you install mineral wool behind the panels.

Made from sustainable materials:

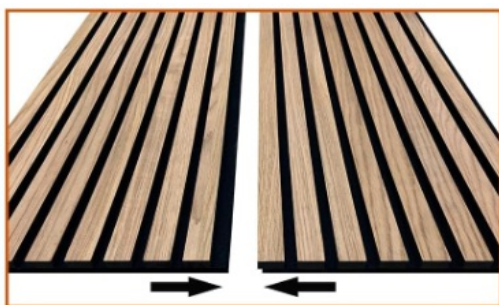

We want to help protecting the environment. That is why our acoustical felt is made from recycled plastic and all the wood we use comes from sustainable forestry.

We want to make sure that the forest can reproduce more trees than what we use.

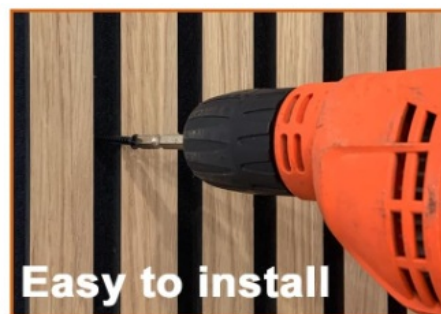

Easy and fast instalment:

Our products are simple and very easy to install. This means that professionals will save a lot of time in the instalment process and for private customers it is the perfect 'Do-It-Yourself-project'.
