## Product Introduction

In the world of interior design and sound management, the Suede Wrapped Acoustic Panel stands out as a perfect blend of functionality and elegance. Designed to enhance the acoustics of any space while adding a touch of sophistication, these panels are ideal for home theaters, recording studios, offices, and even living rooms. The luxurious suede fabric not only provides a premium finish but also ensures superior sound absorption, making it a must-have for anyone looking to improve their environment's audio quality and aesthetic appeal.

## Key Features

- Premium Suede Fabric:** The panels are wrapped in high-quality suede, offering a soft, luxurious texture that complements any decor.
- Excellent Sound Absorption:** Designed to reduce echoes, reverberation, and background noise, these panels improve sound clarity and create a more comfortable acoustic environment.
- Customizable Sizes and Colors:** Available in a variety of sizes and colors to suit your specific needs and preferences.
- Eco-Friendly Materials:** Made with sustainable and non-toxic materials, ensuring a safe and environmentally friendly product.

## Benefits

- Enhanced Acoustics:** Perfect for spaces where sound quality matters, such as home theaters, studios, and conference rooms.
- Aesthetic Appeal:** The suede finish adds a touch of elegance and sophistication to any room.
- Versatility:** Suitable for both residential and commercial spaces.
- Durability:** Built to last, with high-quality materials that resist wear and tear.

### MDF material

has stable structure, strong bending resistance and good environmental performance

### Polyester fiber

has good sound absorption properties, can reduce sound reflection and echo, and has Eco-Friendly

**RICH COLORS AND RANDOM  
COMBINATION**

## APPLICATION SCENARIO DIAGRAM

## FAQ

### What do I need for installation?

For installation, you will need a drill and any appropriate fastening hardware. For example, if you're mounting into drywall (rather than studs), you'll want to purchase drywall anchors with the appropriate screws. Please note screws are not included with the panel.

### Can I cut the panels?

Yes, absolutely. The panels are easy to cut using a handsaw or a circular saw. Simply measure twice and cut once!

### Can I hang a TV from the panels?

We don't recommend hanging a TV directly from the panels, instead cut out a gap for the TV mount and mount it to your wall as you regularly would. From there, you can install the panels around the mount before hanging your TV from the mount.

### How do I wash the panels?

The best way to wash the slats is with a well-wrung cloth or duster. If you ever want to clean the felt between the slats, simply use a vacuum.
