Product Introduction

When it comes to creating a space that is both visually stunning and acoustically optimized, the Suede Wrapped Acoustic Panel is the ultimate solution. Combining premium materials with cutting-edge sound absorption technology, these panels are designed to enhance the ambiance of any room while addressing noise-related challenges. Whether you're designing a home theater, upgrading your office, or revamping a recording studio, these panels offer the perfect balance of form and function.

Key Features

- Luxurious Suede Finish:** The panels are wrapped in high-quality suede fabric, available in a range of colors to match any decor style.
- Superior Sound Absorption:** Engineered to reduce echoes, reverberation, and background noise, these panels improve sound clarity and create a more peaceful environment.
- Customizable Design:** Choose from a variety of sizes, shapes, and colors to create a personalized look.
- Eco-Friendly Construction:** Made with sustainable materials, these panels are safe for both your home and the environment.
- Easy to Install:** Lightweight and simple to mount, the panels can be installed on walls or ceilings with minimal effort.

Application

- Home Theaters:** Create a cinematic experience by eliminating echoes and enhancing sound quality.
- Recording Studios:** Achieve professional-grade acoustics for crystal-clear audio recordings.
- Offices:** Reduce noise distractions and foster a more productive work environment.
- Living Spaces:** Add a touch of elegance while controlling noise levels in open-concept areas.
- Restaurants and Cafes:** Enhance customer comfort by minimizing background noise.

Product Parameter

Size	600*2400/2700mm
Width of slats	30mm
Space between slats	12/15mm
Thickness	21mm
Surface	Suede

FAQ

What do I need for installation?

For installation, you will need a drill and any appropriate fastening hardware. For example, if you're mounting into drywall (rather than studs), you'll want to purchase drywall anchors with the appropriate screws. Please note screws are not included with the panel.

Can I cut the panels?

Yes, absolutely. The panels are easy to cut using a handsaw or a circular saw. Simply measure twice and cut once!

Can I hang a TV from the panels?

We don't recommend hanging a TV directly from the panels, instead cut out a gap for the TV mount and mount it to your wall as you regularly would. From there, you can install the panels around the mount before hanging your TV from the mount.

How do I wash the panels?

The best way to wash the slats is with a well-wrung cloth or duster. If you ever want to clean the felt between the slats, simply use a vacuum.
