Product Description

Products Introduction

3D Acoustic Lamp

Enhance your interiors with resilient, feather-light polyester shades! Built to withstand humidity and sunlight, they excel in kitchens, lounges, or high-traffic venues while maintaining color integrity. Their semi-opaque texture filters light into ambient radiance, complementing modern, rustic, or eclectic décors. Effortlessly refresh surfaces using a damp cloth or detachable machine-washable units. Select from fade-defying bold tones or nature-inspired linen/silk finishes—all budget-friendly. Adaptive silhouettes merge seamlessly with pendant, table, or ceiling fixtures. Paired with cool-running LEDs, they optimize energy efficiency without overheating risks. Eco-conscious collections feature recycled plastics transformed into sophisticated designs, merging environmental responsibility with enduring style. Ideal for homes, cafes, or boutique hotels, these shades balance premium aesthetics with low-maintenance functionality. Elevate spaces where practicality and refined elegance coexist effortlessly.

Name	3D Acoustic Lamp
Basic Material	100% Polyester Fiber
Packing	Carton Packing
Size	D52*H35cm
Color	Customization
Featrues	sound absorption, Easy installation
Application	Concert halls, theaters, piano rooms, auditoriums, corridors, gymnasiums, conference rooms, multi-functional halls

Authoritative Quality Inspection Report

Sound absorption and noise reduction stronger

The highest sound absorption coefficient (NRC) is above 0.87 in the range of 125~4000HZ noise

Sound-absorbing principle of sound-absorbing board

When sound waves enter the porous sound-absorbing material, due to the viscous resistance of the air, the vibration friction between the air and the hole wall. A considerable part of the sound energy is converted into heat energy and absorbed.

Why Choose To Join MO

- ✓ We are the most innovative manufacturer in the industry in China.
- ✓ Our team of global professional engineers and consultants are highly qualified.
- ✓ We have over 10 years of experience in the field of sound-absorbing panels.
- ✓ We have 4 production lines and can deliver products within 7 days.

FAQ

1. Can I get free samples and how long does it take to produce samples?

If the samples you need are in our stock, they will be provided to you free of charge. Customized samples usually take about a week to produce.

2. Do you accept OEM or ODM order?

Yes, as a manufacturer, we can produce acoustic materials based on your samples or drawings. Please do not hesitate to contact us.

3. How to get an accurate quotation?

Can provide us with detailed product information, such as pattern, core material, surface, etc. If you have CAD or other drawings.

4. Payment terms

T/T 30% deposit before production, 70% balanced payment before delivery.

For more information, please feel free to contact us.
