Soundproof Recycled 3D Polyester Fiber Acoustic Panel for Space Decoration

Basic Information

Place of Origin: Guangdong, ChinaBrand Name: MQ Acoustics

Model Number: polyester fiber acoustic panel

• Minimum Order Quantity: 50 pcs

• Price: \$7.5/pcs 100-199 pcs

Packaging Details: Carton
Delivery Time: 7-15 days
Payment Terms: T/T

Supply Ability: 5000 pcs per Month

Product Specification

Product Name: 3D PET Panel

Core Material:
 100% Polyester Fiber

• Size: 300*300mm

Color: More Than 48 Colors, Customized

• Installation: Hot Melt Adhesive / Nail

Packing: CartonWarranty: 2 YearsCusomization: Available

Usage: Sound Absorption And DecorationDurability: Highly Durable And Long-lasting

• Eco-Friendly: E1

Application: Classromm, Meeting Room, Etc.

• Highlight: soundproof recycled 3D acoustic panel,

polyester fiber acoustic panel,

3D acoustic panel for space decoration

Product Description

Products Description

These acoustic panels are engineered with 3D polyester fiber made from recycled materials, offering a powerful combination of superior sound absorption and environmental responsibility. The intricate three-dimensional structure dramatically increases the surface area for sound waves to contact and dissipate, effectively reducing wide-frequency noise, echo, and reverberation to create a clearer, more acoustically balanced space.

Beyond their acoustic performance, these panels serve as a modern decorative element, enhancing any interior with their textured, sculptural appeal. Available in a range of colors and styles, they can be customized to seamlessly integrate into and elevate various design aesthetics, from minimalist to industrial. Furthermore, the polyester fiber material is inherently moisture-resistant, flame-retardant (Class B rating), and easy to maintain, ensuring long-term durability, safety, and practicality for both residential and commercial spaces.

Material 100% polyester fiber

Shape Square
