

Architects Highlight UPET Wall Panels as a Breakthrough in Visual and Material Innovation

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: MQ Acoustics
- Minimum Order Quantity: 50 Square Meters
- Price: 6.9USD/Square Meters 100-200 Square Meters
- Packaging Details: Carton Box, Pallet
- Delivery Time: 5-8 work day
- Payment Terms: T/T, D/A, D/P, T/T, Western Union, MoneyGram

Product Specification

- Product Name: Polyester Fiber Acoustic Board
- Material: 100% Polyester Fiber
- Color: More Than 48 Colors To Be Chosen
- NRC: 0.80-0.9
- Transport Package: Carton Box & Pallet
- Function: Interior Decoration And Sound Absorbing
- Acoustic Type: Sound Absorbing Material

Product Introduction

Made from 100% recyclable polyester using a hot-press molding technique, 3D polyester fiber acoustic panels feature a special textured surface. This design works really well at soaking up noise, especially higher-pitched sounds. They're also designed to be strong, resist impact, and handle damp conditions (up to 85% humidity), ensuring they last for years.

Product Name	3D Polyester Fiber Acoustic Panel
Application	Walls, Ceilings
Material	100% Polyester Fiber
Thickness	9mm / 12mm / 24mm
Color	more than 48 colors options (customizable upon request)
Size	1220*2440mm / 1200*600mm(custom sizes available)
Fire Rating	Class B
Eco-Certification	Meets E1 environmental standards, formaldehyde-free, odorless

What really makes this material stand out goes beyond its technical specs—it's how it opens up creative design and makes building easier. It lets you go beyond plain acoustic panels. You can customize colors, patterns, and 3D shapes based on your theme, turning walls into eye-catching art. It's great for building 3D feature walls or artistic ceilings that divide space and manage sound all at once. That's perfect for concert halls, high-end offices, or brand showrooms where sound and style need to work together. Putting it up is straightforward, too, with eco-friendly glue or a simple click-in system, saving time and lowering project costs.

VERTICAL INTEGRATION

from raw materials to finished products

- **Rapid Delivery of Goods**
- **5 Patented Technologies**
- **International Certification System**
- **4 Fully Automatic Production Lines**

Specifications

- 1 Material: 100% polyester fiber
- 2 Size: 1220mm x 2440mm
- 3 Thickness: 9mm/12mm/24mm
- 4 Density: 1200g-3700g/m²
- 5 Edge: square or beveled
- 6 Eco-Friendly: Class E1
- 7 Permanent flame retardant

Normal size in stock, other size, please contact us.

Support color, shape, density, thickness customization

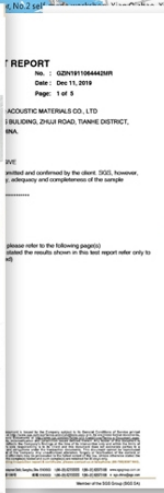

Surface engraving and UV printing design

3D design and mold development

Certification

MAGIC CUBE Acoustics has focused on the R&D, production and sales of various sound absorption and sound insulation products. Our products have passed CE, ISO9001 & SGS certificate. MAGIC CUBE has more than a dozen patented acoustic technology products, and more than 30 domestic and international test reports.

One-Stop Acoustic Solution:

- ✔ Healthy Acoustic Environment
- ✔ Precise Sound Field Control
- ✔ Full-Scenario Customized Solutions

FAQ

1. Can I get free samples and how long does it take to produce samples?

If the samples you need are in our stock, they will be provided to you free of charge. Customized samples usually take about a

week to produce.

2. Do you accept OEM or ODM order?

Yes, as a manufacturer, we can produce acoustic materials based on your samples or drawings. Please do not hesitate to contact us.

3. How to get an accurate quotation?

Can provide us with detailed product information, such as pattern, core material, surface, etc. If you have CAD or other drawings, don't hesitate to send it to us.

4. Payment terms

T/T 30% deposit before production, 70% balanced payment before delivery.

For more information, please feel free to contact us.
